About Lafeber Company

Two Generations of Veterinarians Caring and Working for the Health of Animals through Advanced Nutrition, Exceptional Quality, and Education

[Lafeber Company](#) was built by a father-son team of veterinarians with a shared love of animals and a special passion for birds. Dr. T.J. Lafeber developed the very first commercial bird food pellets in the back room of his veterinary clinic in the early 1970s. Today, our exotic animal diets and critical care formulas are developed by his son, Dr. Ted Lafeber, III along with top veterinarians and nutritionists. An independent laboratory tests every diet to insure optimum pet health. Lafeber Company also consults leading experts in behavior so that our diets promote dietary enrichment.
